INTERVIEW SUMMARY(cont.)

Claims discussed: 44-49, all claims discussed.

Identification of prior art discussed: <u>art provided by applicant (already of record)</u> and new art submitted by declarant (made of record).

Description of the general nature of what was agreed to if an agreement was reached, or any other comment: Applicant was advised that upon the filing of an appeal or a continuation request the amendment to claim 48 would be entered. However, applicant was also advised that the "opinion" and "belief" of a third party has been deemed to be nothing more than self serving in light of the continued absence of an enabled disclosure. Speculation by the declarant concerning what might have been possible at the date of filing does not cure the missing enabling support. Examiner noted that a CIP filing incorporating more recently developed data would probably provide some support for a portion of the claimed subject matter in light of the Tor et al. reference already of record. Applicant is reminded that a patent application is **not** a research proposal and is granted for what applicant has already done, not what applicant expects to be able to do at some time in the indefinite future (i.e. a patent is not a hunting license; Brenner v. Manson, 148 USPO 689 (S. Ct., 1966)).
